

Who is it for?

This new course has been developed to provide pharmacy employers with a structured training programme for pharmacy undergraduate students working in their pharmacies, whether this is during summer holidays or as a part time/weekend employee.

What is it?

The programme is divided into two parts and contains numerous inter-text activities, as well as MCQs and case studies to demonstrate the student's understanding.

Duration

The programme includes a suggested time table to follow. This can be tailored according to the length of time the student will be working with you. The student can study at their own pace and over a period of time that suits them and their employer.

This programme provides the ideal platform for students to move on to the **NPA Preregistration Trainee Pharmacist Training programme.**

NPA
